Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 14 is objected to because of the following informalities: it is noted that claim 6 is an apparatus claim, it appears that claim 14 is assigned a wrong dependency. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Rice (5511365).

Rice discloses and as shown in the marked up drawings for greater clarity:

Bore/grooves & lip/fingers/support members or slidable connectors for interlocking & slidable connection (cl. 2-7)

mid collar or resilient sleeve capable of urging the adjacent roller sections apart as it covers a gap below it (cl. 1)

4. As applied to claim(s) 8-14, in view of the structure disclosed/taught by Rice, the method of operating/using the device is inherent since it is the normal and logical manner in which the device is used.

Response to Arguments

5. Applicant's arguments filed 6/21/2004 have been fully considered but they are not persuasive.

In re applicant's argument on pg. 2, Examiner contends that as claimed: "a gap in said end connectors and a resilient sleeve covering said gap and urging said adjacent roller sections apart" is met by the prior art, because the bronze or other noncorrosive metal (which can be or is a resilient material design choice) sleeve does keeps therefore urges the roller sections apart. The fact that it also holds them together does not preclude that it actually keeps the roller sections apart as shown in fig 2 of the prior art.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
